From Springer : Electronic Technology and Civil Procedure: New Paths to Justice from Around the World (Ius Gentium: Comparative Perspectives on Law and Justice) before purchasing it in order to gage whether or not it would be worth my time, and all praised Electronic Technology and Civil Procedure: New Paths to Justice from

Around the World (Ius Gentium: Comparative Perspectives on Law and Justice):

The most comprehensive treatment of an increasingly urgent topic, this book explores issues relating to electronic justice from around the world and includes the key reports from the 2010 International Association of Procedural Law Conference in Pecs, Hungary.

From the Back Cover This book contains the seven main reports and eleven correferates of the 2010 International Association of Procedural Law Conference in Pecs. During this conference, participants from around the world examined all aspects of the impact of modern information technology on civil procedure, ranging from the electronic submission of the application to electronic service of documents and electronic means of proof supported by modern information technology. In addition to practical issues, they discussed the possible impact of electronic procedures on traditional principles of civil procedure. The IAPL was the first to put the effect of modern and communication technology on civil procedure on the agenda, in 1999. This confirmed Lord Woolfs statement from the 90s, that IT will not only assist in streamlining and improving our existing systems and process; it is also likely, in due course, itself to be catalyst for radical change as well...
