From Ashgate : Emerging Technologies: Ethics, Law and Governance (The Library of Essays on the Ethics of Emerging Technologies) (Volume 3) before purchasing it in order to gage whether or not it would be worth my time, and all praised Emerging Technologies: Ethics, Law and Governance (The Library of Essays on the Ethics of Emerging Technologies) (Volume 3):

Emerging technologies present a challenging but fascinating set of ethical, legal and regulatory issues. The articles selected for this volume provide a broad overview of the most influential historical and current thinking in this area and show that existing frameworks are often inadequate to address new technologies - such as biotechnology, nanotechnology, synthetic biology and robotics - and innovative new models are needed. This collection brings together invaluable, innovative and often complementary approaches for overcoming the unique challenges of emerging technology ethics and governance.

About the Author Gary E. Marchant is the Regents' Professor of Law at Arizona State University, USA. Wendell Wallach is a lecturer and consultant at Yale University's Interdisciplinary Center for Bioethics, USA.
