From Elsevier Science : Environmental Concerns in Rights-of-Way Management before purchasing it in order to gauge whether or not it would be worth my time, and all praised Environmental Concerns in Rights-of-Way Management:

The management of rights-of-way by electric and telephone utilities, highway departments, gas pipeline companies, and railroads around the world is guided and constrained by policies and regulations to protect the environment. Companies that manage rights-of-way are required to comply with these regulations, and are seeking the most cost-effective management practices which, at the same time, demonstrate stewardship of the environment. Protection of biodiversity and sustainable development are especially important as national goals in many countries, and rights-of-

way managers are seeking practical ways to include public participation in their operations.

About the AuthorThe late John Wisniewski was a technical consultant with DEC (now HP)beginning in 1987. Since 1988 he served as an OpenVMS Ambassador (VMS's Engineering Field liaison to customers). John worked directly for OpenVMS engineering, consulted with HP customers during corporate visits in Houston, and supported OpenVMS's largest VARs. An active member of the Dallas-Fort Worth Users Group, he helped establish the free OpenVMS hobbyist license program and OpenVMS educational license program, and supported Encompass Local User Groups throughout the world with technical advice, information, and lively technical talks on topics ranging from OpenVMS and DEC history to Security and Alpha Configuration. John lived in Mesquite, Texas, with his two aspiring webmaster daughters, Jessica and Jennifer, and their dog Dakota. His hobbies included managing his family's growing VMS, Linux, and Windows Home Internet network, lovingly restoring older DEC hardware, scanning in old DEC documentation, and cleaning his garage...
