Dorte Hoeg : European Merger Remedies: Law and Policy (Hart Studies in Competition Law) before purchasing it in order to gage whether or not it would be worth my time, and all praised European Merger Remedies: Law and Policy (Hart Studies in Competition Law):

As merger transactions become more complex, so do the remedies involved. This book identifies and examines the most important aspects of merger remedies which have emerged and evolved in the European Commission's policy and practice over the past 20 years. The in-depth analysis of applicable provisions and guidelines is structured in accordance with a typical 'remedies lifecycle': the negotiation, submission, assessment, adoption, implementation, and enforcement of remedies. Furthermore, numerous conditional clearance decisions and judgments, as well as studies and legal literature on the subject, are described and put into a coherent analytical framework with the aim of providing as much nuance as possible in the evaluation of the Commission's past and present remedies policy and practice. While the Commission indisputably has accomplished numerous successes in its remedies enforcement over the years, it has also encountered some significant obstacles and shortcomings along the way. To this effect, the final chapter in the book critically assesses whether the current framework, which has remained unchanged since 2008, continues to provide an adequate regulatory response to today's remedies issues and challenges. Where adjustments and improvements are deemed desirable or necessary, possible measures are considered. (Series: Hart Studies in Competition Law - Vol. 7)

There is so much to recommend about this book. It is an incisive and comprehensive work which is reflective enough for academics but written in a way which proves useful to practitioners - an admirable combination and accomplishment.
