Lloyd Dixon, Noreen Clancy, Bruce Bender, Aaron Kofner, David Manheim : Flood Insurance in New York City Following Hurricane Sandy before purchasing it in order to gage whether or not it would be worth my time, and all praised Flood Insurance in New York City Following Hurricane Sandy:

1 of 1 people found the following review helpful. For those who want to know all of the technical reason why flook insurance is the way that it is.By CustomerIt gives you a very good overview of what flook insurance is all about and why it is in the shape that it currently is. It is very technical at times with all of it"s graphs and charts,which makes for a difficult read, while it tries very hard to be easy to understan. I guess since this area of insurance is not as simply as I once thought it was to be: it has to be written in such a manner to explain why flood insurance is only really available

from the federal government. Even the feds appear to want to get out of this line of coverage too, but since there is no alternative for insured, it is stuck as the only real insurar for many people.

Flood insurance payments can help households and businesses recover from an event and get the economy moving again. Premiums can also provide appropriate incentives to avoid or mitigate risk. This report examines dimensions of the changing flood insurance environment in New York City and explores the consequences for the citys residents and businesses.
