Einer R. Elhauge, Damien Geradin : Global Antitrust Law and Economics, 2007 Supplement (University Casebooks) before purchasing it in order to gage whether or not it would be worth my time, and all praised Global Antitrust Law and Economics, 2007 Supplement (University Casebooks):

The 2007 Supplement will include several important new cases, including the U.S. Supreme Court decisions in Weyerhauser (on predatory buying claims), Twombly (on standards for pleading an antitrust conspiracy), Credit

Suisse (on the extent to which securities law creates an implicit antitrust exemption), and Leegin (overruling the per se rule against vertical minimum price fixing). EU competition cases include British Airways (dismissing British Airways appeal in loyalty discount case), France T.I.com (upholding Commission decision finding that France T.I.com abused its dominant position on the French market for Internet access), GlaxoSmithKline (annulling in part the decision prohibiting Glaxo from selling its medicines at different prices according to the place of reimbursement).
